Re: United States v. NL Industries, Inc., et al.
Civ. Action No: 91-578-JLF

Dear Dr.s Rosen, Marcus and Mushak:

Enclosed please find a copy of a study prepared by Dr. Robert Bornschein entitled "The Effectiveness of Soil Removal on Lead Exposure in Granite City", April, 1996. The City of Granite City has submitted this to us requesting that U.S. EPA include this document in the administrative record for the NL Site. I have forwarded the document and request to Region V for its consideration. We would appreciate your review and comments regarding this study.

Please feel free to contact us with any questions.

Sincerely,

John H. Grady
